this book presents a history of radioecology from world war ii through to the critical years of the cold war finishing with a discussion of recent developments and future implications for the field drawing on a vast array of primary sources the book reviews synthesizes and discusses the implications of the ecological research supported by the atomic energy commission aec of the united states government from world war ii to the early 1970s this was a critical period in the history of ecology characterized by a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems this transition was in large part due to the development of radioecology which was a by product of the cold war and the need to understand and predict the consequences of a nuclear war that was planned but has never occurred the book draws on important case studies such as the pacific proving grounds the nevada test site el verde in puerto rico the brookhaven national laboratory and recent events such as the nuclear disasters at chernobyl and fukushima by revisiting studies and archived information from the cold war era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal post cold war developments in radioecology will be also reviewed and contrasted with the aec supported ecology research for further perspectives this book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history

the middle ages was a critical and formative time for western approaches to our natural surroundings. An environmental history of the middle ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period. Humankind's relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late middle ages with the advent of shattering events such as the great famine and the black death considered efflorescences of the climate downturn known as the little ice age that is comparable to our present global warming predicament. Medieval people began to think of and relate to their natural environment in new and more nuanced ways. They now were made to be acutely aware of the consequences of human impacts upon the environment, anticipating the cyclical new ecology approach of the modern world. Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe, John Aberth focuses his study on three key areas: the natural elements of air, water, and earth; the forest and wild; and domestic animals. Through this multi-faceted lens, an environmental history of the middle ages sheds fascinating new light on the medieval environmental mindset. It will be essential reading for students, scholars, and all those interested in the middle ages.

An English abridgment with introduction notes and a review.

We are dragon girls. Hear us roar. Mei, Aisha, and Quinn are treasure dragon girls. They draw on the power of precious gems to transform into mighty dragons, tasked with keeping the Magic Forest safe from harm. The treasure dragon girls must come together as a team, embrace their clawsome new abilities, and save the day. Mei must find the ancient and powerful forest book. Inside its pages is the entire history of the Magic Forest. Without its precious knowledge, things will start to go very wrong in this enchanted place. Read all the books in the treasure dragon arc: 4 Mei, the Ruby treasure dragon; 5 Aisha, the Sapphire treasure dragon; 6 Quinn, the Jade treasure dragon.

Vols for 1898-1968 include a directory of publishers.
